

NEXUS GLOBAL DYNAMIC PORTFOLIO A (USD)

A Sub Fund of Libero International SICAV plc

FACTSHEET - September 2022

INVESTMENT PROCESS

The fund manager's approach to investment combines strong valuation disciplines within a long-term strategic framework, together with a willingness to adjust asset allocation and stock selection in response to short term market opportunities. The Fund is not constrained by one particular investment style such as growth or value, but instead the manager believes that the best returns are achieved by correctly positioning the portfolio to benefit at all stages of each economic cycle. The manager has the mandate to search out value globally and is not constrained by benchmarks and so is well-placed to judge the relative merits of a wide range of investment opportunities. Irrespective of geographic locations, close attention is paid to individual companies in addition to understanding economic conditions. High conviction ideas are supported by a combination of quantitative analysis, in-house research and company visits.

MARKET COMMENTARY

August proved to be a month of two halves for equity markets, beginning positively and continuing July's general move higher, before ending the month on a soggy note. The net result was a slight fall in the value of Nexus Dynamic of -0.63%.

A renewed commitment from central banks to bring inflation under control, despite the inherent risks to the growth outlook, upset both equity and bond markets. The Fed in particular remains committed to curbing inflation, as evidenced by the hawkish speech that Jerome Powell gave at Jackson Hole towards the end of the month. The level of uncertainty in Europe remains elevated. After six months of war in Ukraine there is no sign of a ceasefire, and a recession seems increasingly likely this winter as the region's energy crisis continues to intensify. Russia has continued to limit its gas exports to Europe, which together with the announcement of an unscheduled maintenance shutdown of the Nord Stream 1 pipeline, pushed average gas prices over the month to new all-time highs. The resumption of Ukraine's grain exports through the port of Odessa has eased global food price pressures somewhat however.

The UK and Europe were the month's largest detractors, whilst it was emerging markets that performed best. The US, Japan the Asia Pacific region also added value. In terms of individual stocks, Aveva was the month's best performer following the news that Schneider Electric is considering a bid. Palo Alto was also rewarded for some impressive results. It was a tougher month for GSK, Hialeon and Sanofi on the back of litigation issues to related to heartburn drug Zantac.

Uncertain times present opportunities and the globally diversified structure of Dynamic with an emphasis on quality and liquidity provides the necessary flexibility to benefit from an ever changing environment.

INVESTMENT THEMES

Palo Alto

Palo Alto is now the biggest company in cyber security. In August they reported a strong set of Q4 results. Fiscal fourth quarter revenue grew 27% year over year to \$1.6 billion, while billings grew 44% year over year to \$2.7 billion. This was the fastest billings growth in around 4 years which highlights the importance placed on security right now.

References to specific securities are not recommendations to buy or sell those securities.

OBJECTIVE

The Nexus Global Dynamic Portfolio is an actively managed, globally diversified equity portfolio. The aim is for capital growth over the medium term. An understanding of macro economic conditions together with detailed research into individual securities is used to construct a diversified, highly liquid portfolio.
