

NEXUS GLOBAL SOLUTIONS PORTFOLIO A (EURO)

A Sub Fund of Libero International SICAV plc

FACTSHEET - November 2023

INVESTMENT PROCESS

The fund manager's approach to investment combines strong valuation disciplines within a long-term strategic framework, together with a willingness to adjust asset allocation and stock selection in response to short term market opportunities. The Fund is not constrained by one particular investment style such as growth or value, but instead the manager believes that the best returns are achieved by correctly positioning the portfolio to benefit at all stages of each economic cycle. The manager has the mandate to search out value in all asset classes and so is well placed to judge the relative merits of a wide range of investment opportunities.

MARKET COMMENTARY

The challenging market conditions seen in the third quarter continued into October as bonds and stocks fell simultaneously, with the US equity market briefly entering correction territory. Against this backdrop Nexus Solutions returned -2.31% over the month.

The US 10-year Treasury yield pushed above 5% for the first time since 2007, driven by a combination of buoyant economic data making 'higher for longer' rates look increasingly likely, and concerns around the sustainability of government finances.

Stocks fell globally as the prospect of 'higher for longer' rates hurt equity multiples and the Israel-Hamas conflict dampened risk appetite. Developed market equities fell 2.9% on the month, while emerging market stocks fell 3.9%.

Growth stocks proved relatively resilient versus their value counterparts, returning -2.4% over the month in comparison to -3.4% for value stocks. Defence contractor BAE Systems was among the top performers over the month on the back of escalating tensions in the Middle East, whilst Netflix shares reacted strongly to their recent results. It was a tough month for alternative assets with most failing to protect capital.

Despite the continued resilience seen in economic activity in the US year to date, our base case is still for a slowdown to materialise. Beyond the increasingly concentrated S&P 500, valuations for many parts of the equity market are below historical averages. A focus on balance and diversification can potentially better help weather short-term volatility.
