

NEXUS GLOBAL DYNAMIC PORTFOLIO B

A Sub Fund of Libero International SICAV plc

FACTSHEET - March 2024

INVESTMENT PROCESS

The fund manager's approach to investment combines strong valuation disciplines within a long-term strategic framework, together with a willingness to adjust asset allocation and stock selection in response to short term market opportunities. The Fund is not constrained by one particular investment style such as growth or value, but instead the manager believes that the best returns are achieved by correctly positioning the portfolio to benefit at all stages of each economic cycle. The manager has the mandate to search out value globally and is not constrained by benchmarks and so is well-placed to judge the relative merits of a wide range of investment opportunities. Irrespective of geographic locations, close attention is paid to individual companies in addition to understanding economic conditions. High conviction ideas are supported by a combination of quantitative analysis, in-house research and company visits.

MARKET COMMENTARY

The mixed picture for asset markets seen in January continued into February, as the fortunes of equity and fixed income investors diverged against a background of economic resilience that continued to push out expectations for rate cuts. Against this backdrop the Nexus Dynamic portfolio was +4.57% over the month.

Major stock indices in the US, Europe, and Japan hit all-time highs. The surge in risk sentiment was driven primarily by portfolio holding Nvidia's larger than expected revenues, which were boosted by strong demand for their artificial intelligence chips. Meanwhile, US inflation came in higher than predicted, leading investors to lower their expectations that interest rate cuts would occur soon. Elsewhere within equities, emerging markets performed well, thanks primarily to a Chinese rebound. In contrast, UK stocks lagged.

Delving into what holdings performed well over the month, it was the aforementioned Nvidia that was the best performer, supported by strong returns from our other chip companies AMD and TSMC. Long-term performer Palo Alto had a turbulent month, rising both before and after results, but falling by nearly a third on the day of the results on the back of lower-than-expected guidance. The net result was a fall of 8% for the month.

We remain positive on equities, but are mindful of the size of the gains in the last few months. We remain focused on quality and diversification as the cornerstones for long-term returns for the portfolio.

INVESTMENT THEMES

Nvidia

Nvidia was one of the best performing holdings in February for the portfolio. The chipmaker reported revenues up 265%, a 10% beat, driven by new products and despite China sales being down over 75% (from 20% of sales to 5%) given US restrictions. We expect China to improve as Nvidia sells China specific chips in the coming quarters.

OBJECTIVE

The Nexus Global Dynamic Portfolio is an actively managed, globally diversified equity portfolio. The aim is for capital growth over the medium term. An understanding of macro economic conditions together with detailed research into individual securities is used to construct a diversified, highly liquid portfolio.
