

NEXUS GLOBAL DYNAMIC PORTFOLIO A (EURO)

A Sub Fund of Libero International SICAV plc

FACTSHEET - December 2021

INVESTMENT PROCESS

The fund manager's approach to investment combines strong valuation disciplines within a long-term strategic framework, together with a willingness to adjust asset allocation and stock selection in response to short term market opportunities. The Fund is not constrained by one particular investment style such as growth or value, but instead the manager believes that the best returns are achieved by correctly positioning the portfolio to benefit at all stages of each economic cycle. The manager has the mandate to search out value globally and is not constrained by benchmarks and so is well-placed to judge the relative merits of a wide range of investment opportunities. Irrespective of geographic locations, close attention is paid to individual companies in addition to understanding economic conditions. High conviction ideas are supported by a combination of quantitative analysis, in-house research and company visits.

MARKET COMMENTARY

Mostly, November was a good month for shares, but then in the last few days the emergence of the Omicron variant of Covid 19 de-railed sentiment. Despite this, the Nexus Global Dynamic portfolio ended down by only -1.02%. Year to date the return remains well into positive territory.

Short term uncertainties aside, the factors that drove markets higher in October and for much of November remain in place. Global economic growth is on an upward track and company earnings are continuing to exceed expectations. Whether renewed movement restrictions and will damage growth next year is uncertain, but early indications are that well managed businesses will adapt to the challenge.

Last month although equity markets fell, a number of the portfolio holdings moved higher including some significant winners; AMD and Nvidia produced gains in excess of 30%. The emphasis on western markets and the US in particular was also helpful for performance.

The months ahead are likely to contain their fair share of uncertainties. Not only the impact of the Omicron variant, but also the prospect of higher interest rates in many parts of the world including the US. These are challenges for the year ahead, but as it has been throughout 2021, the Nexus Global Dynamic portfolio remains positioned for growth, but always with an eye on protecting the downside.

INVESTMENT THEMES

Nvidia

Nvidia is the leader in the design and production of Graphics Processors Units (GPU). GPUs are used in PC graphics cards for gaming, in Datacentres for Artificial Intelligence & Machine Learning and for machine vision in Autonomous driving, Drones, Medical Imaging and Robotics. We think Nvidia's GPUs are at the intersection of a number of important computing trends including the movement to the Cloud, AI and autonomous vehicles. In November they reported Q3 results with revenues up 50%, 4% ahead of consensus.

References to specific securities are not recommendations to buy or sell those securities.

OBJECTIVE

The Nexus Global Dynamic Portfolio is an actively managed, globally diversified equity portfolio. The aim is for capital growth over the medium term. An understanding of macro economic conditions together with detailed research into individual securities is used to construct a diversified, highly liquid portfolio.

ASSET ALLOCATION

As at 30 November 2021
